\*Sabbath Mode overrides auto oven shutoff

\*\*Stainless model has stainless door

**NOTES:**

1. Base must be capable of supporting 225 pounds.
2. Cutout depth is critical to the proper installation of the built-in oven. If the oven decorative trim does not butt against the cabinet, or if noise is heard on convection models, verify the dimension to assure it is the required depth.
3. For a cutout height greater than 41 11/16", add one 2" wide wood shim of appropriate height to each side of the opening under the appliance rails.
